

## **North Florida Surgery Center**

### **AFTER PROCEDURE**

1. Follow your doctor's order regarding diet, rest and medication once you have returned home after your procedure.
2. You may feel a little sleepy or dizzy for several hours after your procedure. This is normal.
3. A few days after your procedure, we will call you to see how you are and to answer any questions you might have.
4. Do not drive a vehicle or operate machinery for 24 hours after your procedure.
